The Nissan Skyline's produced for the film were all R34s (the model itself was introduced back in 1998). The R34 in the films were powered by a RB26DETT 2.6-liter, DOHC, 24-valve straight six sitting longitudinally in the engine bay that's force fed by twin turbos and officially rated at 280 hp. The R34's engine feeds a six-speed Getrag gearbox that in turn sends power to the ATTESA all-wheel-drive system, which electronically varies the torque split. Super HICAS four-wheel steering is also aboard and includes an electronic feedback control system to ensure precise wheel positioning under extreme circumstances. But the big change for the R34 from previous Skylines was a stiffened body shell and fresh aerodynamic design. This car has carb...
